

In the claims

1. (Currently amended) A method of entering a command directed to achieve an action, comprising:

providing a WWW browser having a window with a designated URL field and a graphical display area;

entering a text string representing a command in a format which is neither a standard URL nor a portion thereof, into said designated URL field; and

translating, by machine, said command into at least one action, wherein ~~said action is directed to one or both of modifying files, and copying data~~ text string comprises a multiplicity of words and said command is identified according to at least one of said multiplicity of words.

2. (Cancelled)

3. (Previously Presented) A method according to claim 1, wherein said command is directed to executing a program.

4. (Original) A method according to claim 1, wherein said command modifies the action of an currently executing program.

5. (Currently Amended) A method according to claim 1, wherein said command is directed to modifying a behavior of said WWW browser from a first behavior to a second behavior, such that presentation of a WWW page under the second behavior would be different than presentation of said WWW page under the first behavior.

6. (Currently Amended) A method of entering a command directed to achieve an action, comprising:

providing a WWW browser having a window with a designated URL field and a graphical display area;

entering a text string representing a command in a format which is neither a standard URL nor a portions thereof, into said designated URL field; and

translating, by machine, said command into at least one action ~~A method according to claim 1,~~ wherein said command is directed to affecting a translation of a future command into an action,

7. (Original) A method according to claim 1, wherein said action is carried out by an operating system under which said browser is executing.
8. (Currently amended) A method according to claim 1, wherein said action has a physical manifestation outside of any computer hardware.
9. (Original) A method according to claim 8, wherein said manifestation comprises making a telephone connection.
10. (Original) A method according to claim 8, wherein said manifestation comprises printing a file.
11. (Original) A method according to claim 1, wherein said action is performed on a same computer as is executing said browser.
12. (Original) A method according to claim 1, wherein said action is performed on a computer remote from a computer executing said browser.
13. (Original) A method according to claim 1, wherein said command is translated on a same computer as is executing said browser.
14. (Original) A method according to claim 1, wherein said command is translated on a computer remote from a computer executing said browser.
15. (Original) A method according to claim 1, comprising parsing said text to yield said command.
16. (Original) A method according to claim 15, wherein said parsing is performed on a computer remote from a computer executing said browser.
17. (Original) A method according to claim 15, wherein said parsing is performed on a same computer as executes said browser.

18. (Original) A method according to claim 1, wherein said action is affected by a context.
19. (Original) A method according to claim 18, wherein said context affects said translation.
20. (Original) A method according to claim 18, wherein said context affects a parsing of said text into said command.
21. (Original) A method according to claim 18, wherein said context affects one or more parameters associated with said command.
22. (Original) A method according to claim 18, wherein said context comprises a virtual personality associated with a user using said browser.
23. (Original) A method according to claim 18, wherein said context comprises a WWW page displayed by said browser.
24. (Original) A method according to claim 18, wherein said context comprises a state of at least one software package other than said browser.
25. (Original) A method according to claim 24, wherein said software package is executing on a same computer as said browser.
26. (Original) A method according to claim 18, wherein said context comprises a current state of affairs.
27. (Original) A method according to claim 18, wherein said context comprises a history of a state of affairs.
28. (Original) A method according to claim 27, wherein said history comprises a history of actions by a machine.
29. (Original) A method according to claim 27, wherein said history comprises a history of data display.

30. (Original) A method according to claim 27, wherein said history comprises a history of user input.

31. (Original) A method according to claim 1, wherein said command has an effect on future actions dictated by future commands.

32. (Original) A method according to claim 1, wherein said text contains said command in an explicit manner.

33. (Original) A method according to claim 1, wherein said text contains said command in an implicit manner.

34. (Original) A method according to claim 33, wherein said command is determined responsive to an identification of a type of data comprised in the text string.

35. (Original) A method according to claim 1, wherein said command comprise a natural language format command.

36. (Original) A method according to claim 1, wherein said command comprise a fixed format command.

37. (Previously Presented) A method according to claim 1, comprising displaying a graphical display on said browser responsive to said action.

38. (Original) A method according to claim 37, wherein said display comprises a result of said action.

39. (Original) A method according to claim 37, wherein said display comprises a status report on said action.

40. (Original) A method according to claim 37, wherein said display is displayed asynchronously.

41. (Original) A method according to claim 37, wherein said display is generated on a same computer as is executing said browser.
42. (Original) A method according to claim 37, wherein said display is generated on a computer remote from a computer executing said browser.
43. (Original) A method according to claim 37, wherein said display comprises a request to clarify said action.
44. (Original) A method according to claim 37, wherein said display is modified in real-time responsive to said command.
45. (Original) A method according to claim 44, wherein said display comprises a multi-media stream.
46. (Original) A method according to claim 37, wherein said display modifies a previously displayed data page on said browser.
47. (Currently Amended) A method of performing an action, comprising:
providing a text string in a location reserved for a standard URL in a browser comprising said location and a graphical display;
parsing said string to determine a command directed to achieve said action, said parsing being at a location other than a domain indicated by said string; and
executing said command to perform said action, ~~which action includes one or more of modifying files, and copying data.~~
48. (Original) A method according to claim 47, wherein said string is a standard URL.
49. (Original) A method according to claim 47, wherein said string is not a standard URL.
50. (Previously Presented) A method according to claim 47, wherein providing said text string comprises entering said string in a input field for a URL.

51. (Previously Presented) A method according to claim 47, wherein providing said text string comprises providing said string in parameter position reserved for a URL in a network programming language.

52. (Original) A method according to claim 51, wherein said language comprises Java.

53. (Original) A method according to claim 51, wherein said language comprises HTML.

54. (Previously Presented) A method according to claim 1, wherein said browser displays live information from the Internet.

55. (Previously Presented) A method according to claim 12, wherein said remote computer communicates with said browser over the Internet.

56. (Currently amended) A method of interacting with ~~an existing~~ an executing program having one or more interfaces, the method comprising:

executing a browser, said browser including a browser interface, which is not one of the program's one or more interfaces;

entering a command directed to said program, using said browser interface, ~~not through a browser interface associated with said program;~~ and

receiving a response to said command from said program.

57. (Original) A method according to claim 56, wherein said response is displayed by said browser.

58. (Currently Amended) A method according to claim 56, wherein said ~~software program~~ comprises a software program executing on a same machine as said browser.

59. (Currently Amended) A method according to claim 56, wherein said ~~software program~~ comprises a software program executing on machine remote from a machine executing said browser.

60. (Original) A method according to claim 59, wherein said two machines are connected via the Internet.

61. (Previously Presented) A method according to claim 56, wherein said command is entered into a URL field of said browser.
62. (Previously Presented) A method according to claim 56, wherein said command is entered by interacting with a graphical display on said browser.
63. (Original) A method according to claim 62, wherein said graphical display is generated by a program executing on a computer remote from a computer executing said browser.
64. (Currently amended) A method of browsing comprising:
 providing a WWW browser;
 displaying a graphical display of a WWW page using said browser, which browser behaves under a first behavior; and
 modifying said first behavior to a second behavior by entering to said browser a text command directed to modify presentation of a WWW page; such that presentation of a WWW page under the second behavior would be different than presentation of said WWW page under the first behavior.
65. (Original) A method according to claim 64, wherein said command modifies a display attribute of said browser.
66. (Original) A method according to claim 64, wherein said command modifies a URL interpretation function of said browser.
67. (Original) A method according to claim 66, wherein said URL interpretation function comprises a URL completion function.
68. (Previously Presented) A method according to claim 1, wherein said command includes manipulating files.
69. (Previously Presented) A method according to claim 1, wherein said command includes executing programs.

70. (Previously Presented) A method according to claim 1, wherein said command comprises instructions to software other than the browser, the software running simultaneously with the browser on a local computer.
71. (Previously Presented) A method according to claim 1, wherein in response to said command a page is generated for display with said browser.
72. (Previously Presented) A method according to claim 56, wherein the command is entered to a designated URL field of the browser in a format which is neither a standard URL nor a portion thereof.
73. (Previously Presented) A method according to claim 12, wherein said remote computer is connected to a computer executing said browser via an internet.
74. (Cancelled)
75. (Previously Presented) A method according to claim 1, wherein said action is not of a computer hardware.
76. (Previously Presented) A method according to claim 1, wherein said designation is a standard designation.
77. (Previously Presented) A method according to claim 56, wherein the existing program is other than an operating system.
78. (Previously Presented) A method according to claim 1, wherein said graphical display area is adapted for displaying a WWW page.
79. (New) A method according to claim 1, comprising:
displaying a page having a plurality of options for making said action; and
selecting, by the user, one of said plurality of options,
wherein making said action comprising using said one of said plurality of options.

80. (New) A method according to claim 1, wherein said action comprising sending an SMS to a telephone.
81. (New) A method according to claim 79, wherein said action comprising making a telephone connection to a telephone.
82. (New) A method according to claim 79, wherein said action comprising sending an SMS to a telephone.
83. (New) A method according to claim 1, wherein said action comprises at least one of copying data and modifying files.
84. (New) A method according to claim 47, wherein said action comprises at least one of copying data and modifying files.
85. (New) A method of making a telephone connection, the method comprising:
 providing a WWW browser having a window with a designated URL field and a graphical display area;
 entering a text string representing a command in a format which is neither a standard URL nor a portion thereof, into said designated URL field; and
 translating, by machine, said command into at least one action comprising making a telephone connection through a program,
 and displaying, on said WWW browser, feedback from said program.
86. (New) A method according to claim 47, wherein said text string comprises a multiplicity of words.
